RULES AND REGULATIONS

40. SPECIAL PROVISIONS - LARGE VOLUME CUSTOMERS

Industrial, commercial or other customers using large volumes of gas on a varying basis shall install and maintain at their expense adequate piping and suitable regulating and control equipment to provide reasonable and practical limitation of intermittence or fluctuation in the pressure, volume or flow of gas and shall so regulate and control their operations and the use of gas hereunder so as not to interfere with gas service being furnished to them or to any other customers or with the proper and accurate metering of gas at their existing location or any other location.

41. MONITORING OF CUSTOMER USAGE

The Company monitors each customer's usage on a monthly basis in order to detect unusual deviations in individual customer consumption. Prior to each monthly billing, the Company compares the customer's current consumption with prior usage. Should an unusual deviation in the customer's consumption be found, the Company makes a reasonable attempt to determine the reason for the unusual deviation including re-reading the meter and testing the meter if required.

If the cause for usage deviation cannot be determined from analysis of the customer's meter reading and billing records the Company will contact the customer by telephone or in writing to determine whether there have been changes such as different number of household members or work staff, additional or different appliances, changes in business volume or known leaks in the customer's service line.

The Company will notify the customer of the investigation, its findings and any refunds or backbilling in accordance with 807 KAR 5:006, Section 11 (4) and (5).

PURSUANT TO 807 KAR 5:011 SECTION 9 (1)

CLASSIFICATION OF SERVICE
RATE SCHEDULES

WEATHER NORMALIZATION ADJUSTMENT CLAUSE APPLICABLE TO
RESIDENTIAL AND SMALL NON-RESIDENTIAL GENERAL SERVICE RATE SCHEDULES

WEATHER NORMALIZATION ADJUSTMENT (WNA)

The sales to residential and small non-residential customers shall be increased or decreased monthly by an amount hereinafter described as the Weather Normalization Adjustment (WNA).

DETERMINATION OF WNA

A Weather Normalization Adjustment Factor (WNAF) shall be utilized during the December through April billing months to calculate the non-gas portion of the bills of all residential and small non-residential heating customers. Billing month refers to the month in which the bills are mailed. During the remainder of the year, May through November, the monthly bills shall be computed solely on actual consumption.

(T)

WEATHER NORMALIZATION ADJUSTMENT WILL BE CALCULATED USING THE FOLLOWING FORMULA:

$$\text{WNA} = \text{WNAF} * \text{Actual Mcf} * \text{Base Rate Charge}$$

An average daily base load will be determined separately for residential and small non-residential customers. The average daily base load will remain the same for the WNA December – April billing months. WNA will be billed for 5 billing periods.

An Average Monthly Base Load (AMBL) for residential or small non-residential customers will be calculated by using total Mcf for two month non-heat usage (August/September) divided by total number of residential or small non-residential customers billed for the two month period.

$$\text{AMBL} = \text{MCF} / \text{NUMBER OF CUSTOMER}$$

To calculate the Average Daily Base Load (ADBL), divide the Average Monthly Base Load by the average number of days in the two-month non-heat billing cycle.

$$\text{ADBL} = \text{AMBL} / \text{AVERAGE \# DAYS}$$

Executive Director

EFFECTIVE

7/1/2025

PURSUANT TO 807 KAR 5:011 SECTION 9 (1)

CLASSIFICATION OF SERVICE
RATE SCHEDULES

WEATHER NORMALIZATION ADJUSTMENT CLAUSE APPLICABLE TO
RESIDENTIAL AND SMALL NON-RESIDENTIAL GENERAL SERVICE RATE SCHEDULES

Base Load (BL) is determined by multiplying the Average Daily Base Load per residential or small non-residential customer by the number of days in the billing cycle times the number of residential or small non-residential customers in the billing cycle.

$$BL = ADBL * \# \text{ DAYS IN BILLING CYCLE} * \# \text{ CUSTOMERS IN BILLING CYCLE}$$

The heat load is then determined by subtracting the residential or small non-residential customer's base load from the total Mcf billed in the billing cycle.

$$HL = \text{MCF BILLED IN CYCLE} - BL$$

A Heating Degree Factor (HDF) is then determined by dividing the Normal Degree-Days (NDD) for the billing cycle by the Actual Degree-Days (ADD) in the billing cycle.

$$HDF = NDD / ADD$$

The Weather Normalization Adjustment Consumption (WNAC) is computed by multiplying the Heating Degree Factor times the Heat Load and adding the Base Load to that number.

$$WNAC = HDF * HL + BL$$

The Weather Normalization Adjustment Factor is then calculated by dividing the WNA Consumption by the total Mcf billed in the cycle.

$$WNAF = WNAC / \text{MCF}$$

The WNAF will be recomputed monthly based on company averages. If the WNAF is less than 1.0, the customer's billed amount will be less than the actual amount would have been. If the WNAF is greater than 1.0 the customer's billed amount will be more than the actual amount would have been. The customer's bill is calculated by multiplying the actual Mcf usage by the WNAF times the base rate charge as set forth on Sheet No. 2 of this tariff.

RATE SCHEDULES

RIDER FOR GAS TECHNOLOGY INSTITUTE RESEARCH AND DEVELOPMENT

APPLICABILITY

Applicable within all areas served by Delta. See Tariff Sheet No. 17. This tariff applies to all gas sold by Delta under Delta's residential (Tariff Sheet No. 2), small non-residential (Tariff Sheet No. 3), large non-residential (Tariff Sheet No. 4), interruptible (Tariff Sheet Nos. 5-6) and farm tap (Tariff Sheet Nos. 6.1-6.2) rate schedules. It also applies to transportation by Delta under Delta's on system transportation (Tariff Sheet No. 7-9) rate schedule.

(T)
(T)

GTI R&D Unit Charge

The intent of the Gas Technology Institute Research and Development (GTI R&D) Unit Charge is to maintain the Company's level of contribution at the calendar year 2003 funding amount of approximately \$12,347. The Unit Charge will be billed effective February 1, 2005 at the rate of \$0.002 per Mcf.

WAIVER PROVISION

The GTI R&D Unit Charge may be reduced for one or more classifications of service or rate schedules at any time by the Company by filing notice with the Commission. Any such waiver shall not increase the GTI R&D Unit Charge to the remaining classifications of service or rate schedules without Commission approval.

REMITTANCE OF FUNDS

All funds collected under this rider will be remitted to Gas Technology Institute on an annual basis. The amounts so remitted shall be reported to the Commission annually.

TERMINATION OF THIS RIDER

Participation in the GTI R&D funding program is voluntary on the part of the Company. The Company may terminate this rider at any time by filing a notice of rescission with the Commission.

**CONSERVATION/EFFICIENCY PROGRAM COST RECOVERY
APPLICABLE TO RESIDENTIAL RATE SCHEDULE**

APPLICABILITY

Applicable within all areas served by Delta. See Tariff Sheet No. 17. This tariff applies to all gas sold by Delta under Delta's residential tariff (Tariff Sheet No. 2).

CONSERVATION/EFFICIENCY PROGRAM COST RECOVERY COMPONENT (CEPRC)

Delta's Conservation/Efficiency Program (the Program) is a demand-side management program established to promote conservation and the efficient use of natural gas by Delta's residential customers.

The prices to residential customers shall be increased monthly by an amount hereinafter described as the Conservation/Efficiency Program Cost Recovery Component (CEPRC), which allows Delta to recover costs associated with the Program.

DETERMINATION OF CEPRC

The Company shall file an annual report with the Commission which shall contain updated CEPRC rates at least thirty (30) days prior to the effective date of the new rates. The annual amount computed under the Conservation/Efficiency Program Cost Recovery Component shall be collected based on the CEPRC amount divided by the expected usage for the upcoming program year. For purposes of determining the CEPRC, the program year is defined as the twelve months ended October 31, with rates effective as of the following February 1. The amounts billed under the CEPRC will be computed solely on actual consumption.

The CEPCR is calculated using the following formula:

$$\text{CEPRC} = \text{CEPCR} + \text{CEPLS} + \text{CEPI} + \text{CEPBA}$$

**CLASSIFICATION OF SERVICE
RATE SCHEDULES**

**CONSERVATION/EFFICIENCY PROGRAM COST RECOVERY
APPLICABLE TO RESIDENTIAL RATE SCHEDULE**

Whereby:

CEPCR = CONSERVATION/EFFICIENCY PROGRAM COST RECOVERY

The CEPCR shall include all actual costs which have been approved by the Commission for each twelve month period for conservation/efficiency programs of the Company "approved programs". Such program costs shall include the cost of planning, developing, implementing, monitoring, and evaluating CEP programs. In addition, all costs incurred including, but not limited to, costs for consultants, employees and administrative expenses, will be recovered through the CEPCR.

CEPLS = CEP REVENUE FROM LOST SALES

Revenues from lost sales due to CEP programs implemented on and after the effective date of this tariff will be recovered as follows:

The estimated reduction in customer usage (in Mcf) as a result of the approved programs for the previous twelve months shall be multiplied by the non-variable revenue requirement per Mcf for purposes of determining the lost revenue to be recovered hereunder. Non-variable revenue requirement is base rate charged to the applicable rate class under this tariff.

The aggregate lost revenues attributable to the program participant shall be divided by the estimated residential sales (in Mcf) for the upcoming twelve-month period to determine the applicable CEPLS surcharge.

Recovery of revenues from lost sales calculated for a twelve-month period shall be included in the CEPLS until the implementation of new base rates pursuant to a general rate case.

PURSUANT TO 807 KAR 5:011 SECTION 9 (1)

**CLASSIFICATION OF SERVICE
RATE SCHEDULES**

**CONSERVATION/EFFICIENCY PROGRAM COST RECOVERY
APPLICABLE TO RESIDENTIAL RATE SCHEDULE**

Revenues collected hereunder are based on engineering estimates of energy savings, actual program participation and estimated sales for the upcoming twelve-month period. At the end of each such period, any difference between the lost revenues actually collected hereunder and the lost revenues determined after any revisions of the engineering estimates and actual program participation are accounted for shall be reconciled in future billings under the CEP Balance Adjustment (CEPBA) component.

CEPI = CEP INCENTIVE

For all Conservation/Efficiency Programs, the CEP incentive amount shall be computed by multiplying the net resource savings estimated from the approved programs times fifteen (15) percent. Net resource savings are defined as program benefits less utility program costs and participant costs where program benefits will be calculated on the basis of the present value of Delta's avoided commodity costs over the expected life of the program.

The CEP incentive amount shall be divided by the expected Mcf sales for the upcoming twelve month period to determine the CEPI. CEP incentive amounts will be assigned for recovery purposes to the rate classes whose programs created the incentive.

CEPBA = CEP BALANCE ADJUSTMENT

The CEPBA shall be calculated on a twelve month basis and is used to reconcile the difference between the amount of revenues actually billed through the CEPCR, CEPLS, CEPI and previous application of the CEPBA and the revenues which should have been billed.

The program has an October year-end with rates effective February 1.

The CEPBA is the sum of the following components:

- The amount estimated to be recovered during the current program year from February 1 through October 31 less actual recovery.

CONSERVATION/EFFICIENCY PROGRAM COST RECOVERY
APPLICABLE TO RESIDENTIAL RATE SCHEDULE

- The amount estimated to be recovered during the prior program year from November 1 through January 31 less actual recovery.
- The balance adjustment amounts determined on the basis of the above paragraphs (1) and (2) shall include interest to be calculated at a rate equal to the average of the "3-month Commercial Paper Rate" for the immediately preceding 12-month period.

The balance adjustment amounts, plus interest, shall be divided by the expected Mcf sales for the upcoming twelve-month period to determine the CEPBA for each rate class.

Modifications to CEPRC

The filing of modifications to the CEPRC which require changes in the CEPKR component shall be made at least two months prior to the beginning of the effective period for billing. Modifications to other components of the CEPRC shall be made at least thirty days prior to the effective period for billing. Each filing shall include the following information as applicable:

(1) A detailed description of each CEP program, the total cost of each program over the previous twelve month period and budgeted costs for the next program year, an analysis of expected resource savings, information concerning the specific CEP or efficiency measures to be installed, and any applicable studies which have been performed, as available.

(2) A statement setting forth the detailed calculation of the CEPKR, CEPLS, CEPI, CEPBA and CEPRC.

Each change in the CEPRC shall be placed into effect with bills rendered on and after the effective date of such change.

RATE SCHEDULES

PIPE REPLACEMENT PROGRAM ("PRP") RIDER

APPLICABILITY

Applicable to all customers receiving service under the Company's Rate Schedules, Residential, Small Non-Residential, Large Non-Residential and Interruptible Services.

CALCULATION OF PIPE REPLACEMENT RIDER REVENUE REQUIREMENT

The PRP Rider Revenue Requirement includes the following:

- a. PRP-related plant in service not included in base gas rates minus the associated PRP-related accumulated depreciation and accumulated deferred income taxes;
- b. Retirement and removal of plant related to PRP construction;
- c. The weighted average cost of capital on the net rate base is the overall rate of return on capital authorized in the Company's latest base gas rate case, grossed up for federal and state income taxes and PSC assessment;
- d. Depreciation expense on the PRP-related plant in service less retirement and removals;
- e. Reduction for savings in operating and maintenance expense;
- f. Increased property tax expense on the PRP-related plant in service.

PIPE REPLACEMENT PROGRAM FACTORS

All customers receiving service under Delta's Residential, Small Non-Residential, Large Non-Residential and Interruptible Service Rate Schedules shall be assessed a monthly charge in addition to the Customer Charge component of their applicable rate schedule that will enable the Company to complete the pipe main replacement program.

The PRP Rider will be updated annually in order to reflect the expected impact on the Company's revenue requirements of forecasted net plant additions and subsequently adjusted to true up the actual costs with the projected costs. A filing to update the projected costs for the upcoming calendar year will be submitted annually by October 15 to become effective with meter readings on and after the first billing cycle of January. Delta will submit a balancing adjustment annually by March 31 to true-up the actual costs, as offset by operations and maintenance expense reductions, during the most recent twelve months ended December with the projected program costs for the same period. The balancing adjustment true-up to the rider will become effective with meter readings on and after the first billing cycle of June.

CLASSIFICATION OF SERVICE
RATE SCHEDULES**EFFICIENT NATURAL GAS APPLIANCE REBATE PROGRAM**

Rebates shall be offered to Delta Natural Gas residential customers who are constructing a new home, are changing from another energy source to natural gas, or who are adding or upgrading natural gas appliances to efficient models. For those constructing a new home, the rebate will be paid to one of the following parties: a builder constructing speculative home, a builder constructing model, tract or custom home, a customer contracting a builder, a customer acting as a general contractor, or a customer ordering a new manufactured or mobile home.

All equipment must meet program requirements and be installed according to applicable manufacturer's recommendations and code requirements. A customer must present the dated invoice to Delta within 120 days of installation in order to be eligible for a rebate. Delta personnel will perform a verification of the installation prior to granting the rebate. All equipment must meet the program guideline minimum requirements stated below with no exceptions.

Rebate Amounts and Program Guideline Minimum Requirements:

Natural Gas Heating Equipment	Efficiency Level	BTU Input	Rebate Amount
Forced Air Furnace or Boiler	90% or greater	30,000 or greater	\$400.00
Dual Fuel Auxiliary Furnace	90% or greater	30,000 or greater	\$300.00
Space Heater	99%	10,000 or greater	\$100.00
Gas Logs	99%	18,000 or greater	\$100.00
Gas Fireplace	90% or greater	18,000 or greater	\$100.00
Natural Gas Water Heaters	Efficiency Level	Unit Requirement	Rebate Amount
Storage Tank Model	0.57 UEF	30 gallon or greater	\$200.00
Power Vent or Direct Vent Model	0.65 UEF	40 gallon or greater	\$250.00
On Demand Model	0.81 UEF	Tank-less	\$300.00

There shall be no recovering from customers through the Conservation/Efficiency Program of any Efficient Natural Gas Appliance Rebate Program costs, including lost revenues and incentives.
